

Evolving **Our Mission**: From Operational Optimization to Risk-Managed Profitability

beam

- Chinmay Agrawal

Past Challenges

Faced full regulatory ban in Singapore (Jan 2019) and 75% fleet loss in Kuala Lumpur (Mar 2019).

Response

Developed geofencing technology, partnered with local police, and deployed manual check-ins.

Outcome

Established a repeatable, tech-driven asset risk management playbook.

Current Position

Shifted focus from "growth-at-all-costs" to "risk-managed growth"; repositioned as operations and asset-management company beyond scooters.

A New Data-Driven GTM Plan: Focusing on Viable Markets

Sheet for detailed breakdown of calculations is linked here: [Click Here](#)
 (*The most important aspect)

Market Entry Road Map to Profitability (in phases)

1st Round of Deployment - Jan 2020 (6 months)				
Country	New Vehicles Deployed	Vehicles Deployed	Days to Break Even	Ending Capital in the Bank
Australia	13,000	13,000	93	
NZ	2,000	2,000	125	
TOTAL	\$14,735,000	15,000		\$23.56M

Phase 2 (Jul 2020 – Jun 2021)

- Fleet Expansion and Japan Launch
- Expanded fleet and operations in Australia and New Zealand and deployed fleet in Japan, accelerating market penetration and operational scale.

3rd Round of Deployment - July 2021 (18 months)				
Country	New Vehicles Deployed	Vehicles Deployed	Days to Break Even	Ending Capital in the Bank
Japan		2,000	0	
Australia	2,000	25,000	7	
NZ	6,000	10,000	75	
Korea	50,000	50,000	212	
Malaysia	5,000	5,000	289	
TOTAL	\$45,205,000	92,000		\$250M

Phase 1 (Jan 2020 – Jun 2020)

- Initial Fleet Deployment & Regulatory Setup
- Deployed fleets in Australia and New Zealand while initiating Japan’s regulatory groundwork to establish foundational presence and compliance.

2nd Round of Deployment - July 2020 (12 months)				
Country	New Vehicles Deployed	Vehicles Deployed	Days to Break Even	Ending Capital in the Bank
Japan	2,000	2,000	84	
Australia	10,000	23,000	40	
NZ	2,000	4,000	63	
TOTAL	\$13,630,000	29,000		\$104M

Phase 3 (Jul 2021 – Dec 2022)

- Maximize Scale & Regional Rollout
- Maximized fleet scale in Australia and New Zealand with full-scale rollout across Japan, Korea, and Malaysia to capitalize on regional growth opportunities.

Data-Driven Operational Excellence: Our Metrics, Tech, and Strategic Advantage

beam

Defining Core Metrics:

1. Operational Metrics being prioritized –

- Vehicles touched per wage hour (to gauge worker's efficiency) (**VTWH**)
- Touches per Vehicle per Day (how frequent is a vehicle worked upon) (**TPV**)
- Both these metrics then work up to the **avg trips per vehicle per day**, which is directly used in revenue calculations

2. Theft Costs –

- Direct capital expense: Calculated as scooter price = **\$650**
- Opportunity lost: Assuming **LTV of a scooter = \$1300**.

3. Battery Upgradation –

- Calculation of the incremental profit:
 - **TPV decreases** – Lesser frequency of charging
 - **TDV increases** (Trips/day/vehicle) – bigger battery
 - **VTWH increases** – better working efficiency
- This incremental profit is compared with a threshold value to make the call – does it make sense for the additional \$150 investment?

Optimize battery performance across key markets

+20%

Battery Optimization

Upgraded battery systems in Australia, New Zealand, and Japan have increased trips per day by 20% through faster charging and higher throughput.

Implement IoT-led theft control measures

<1%

Theft Loss

Theft interventions deployed in Korea and Japan have reduced loss to under 1%, resulting in significant cost savings per trip.

Establish strategic partnerships to boost utilization

30+

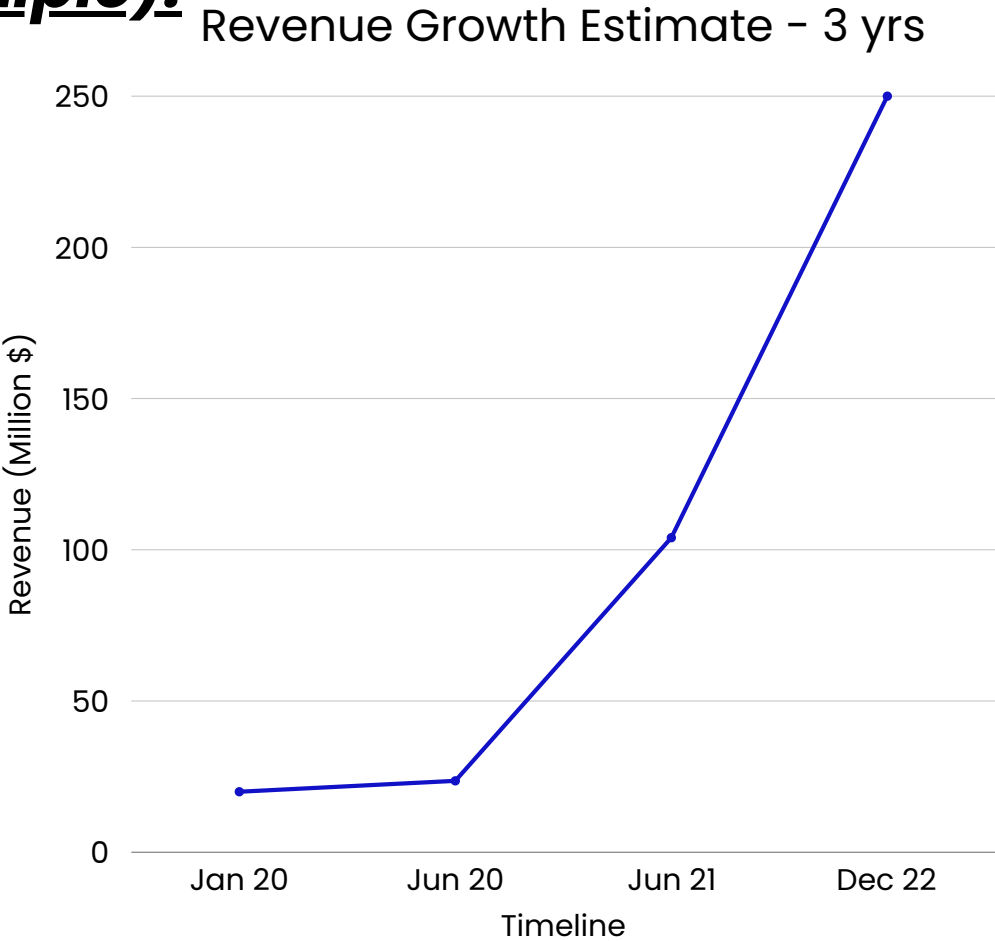

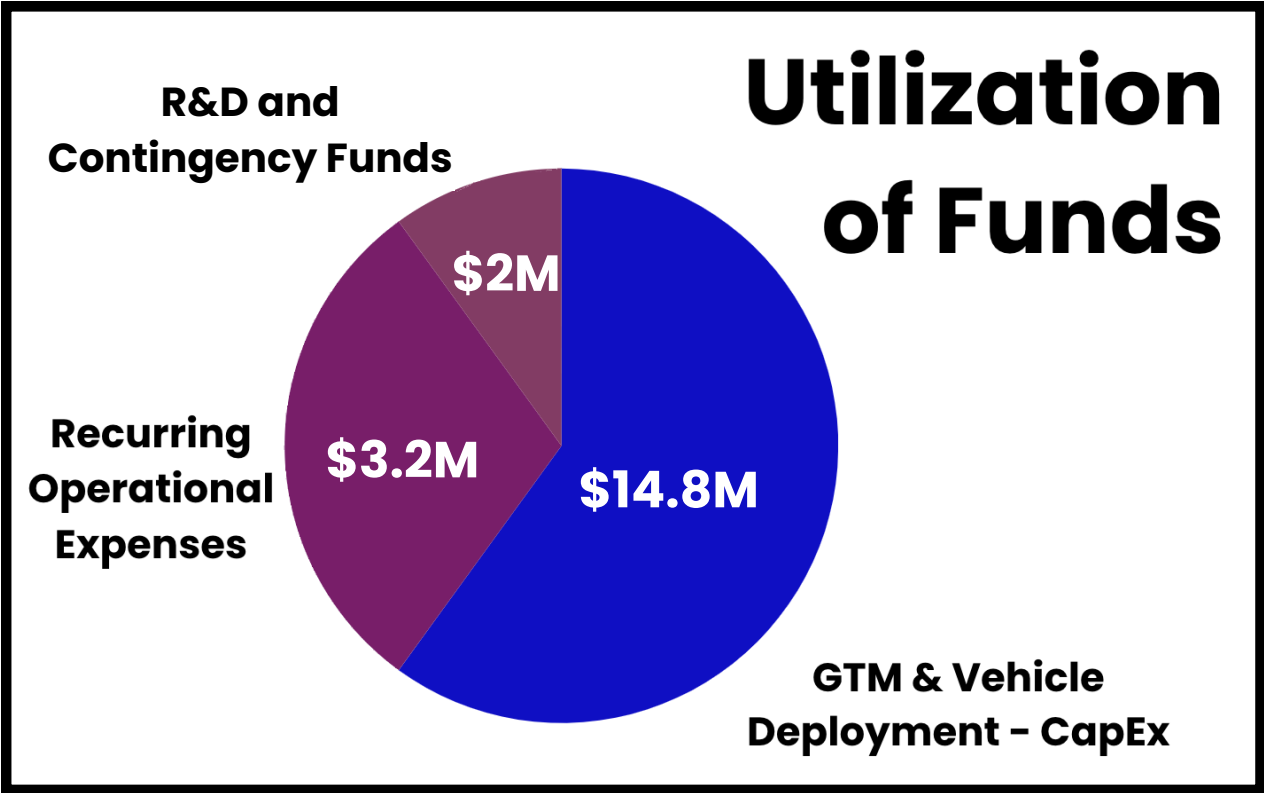

Strategic Partnerships

Collaborations with delivery operators and universities have locked-in asset utilization and increased asset turns for sustained profitability.

The \$20M Ask, Use of Funds, and 3-Year Growth Targets

Your Growth: \$20M → \$250M net profit in 3 years (12.5x multiple).

Annexures – Calculation Mapping for more detailing, if needed.

1st Round of Deployment - Jan 2020 (6 months)									
Country	New Vehicles Deployed	Vehicles Deployed	Battery Upgrade?	Total Cost CapEx	Total Cost/Trip OpEx	Avg Revenue per Trip (\$)	TDV (Trips/Day/Vehicle)	Margins per vehicle per day (Rev-OpEx)	Break even days
Australia	13,000	13,000	Yes	\$12,675,000.000	\$1.807	\$4.00	\$4.800	\$10.53	93
NZ	2,000	2,000	Yes	\$1,960,000.000	\$1.325	\$3.50	\$3.600	\$7.83	125
TOTAL	\$14,735,000	15,000						\$10.17	
2nd Round of Deployment - July 2020 (12 months)									
Country	New Vehicles Deployed	Vehicles Deployed	Battery Upgrade?	Total Cost CapEx	Total Cost/Trip OpEx	Avg Revenue per Trip (\$)	TDV (Trips/Day/Vehicle)	Margins per vehicle per day (Rev-OpEx)	Break even days
Japan	2,000	2,000	Yes	\$1,920,000.000	\$0.609	\$3.00	\$4.800	\$11.48	84
Australia	10,000	23,000	Yes	\$9,750,000.000	\$1.807	\$4.00	\$4.800	\$10.53	40
NZ	2,000	4,000	Yes	\$1,960,000.000	\$1.325	\$3.50	\$3.600	\$7.83	63
TOTAL	\$13,630,000	29,000						\$10.22	
3rd Round of Deployment - July 2021 (18 months)									
Country	New Vehicles Deployed	Vehicles Deployed	Battery Upgrade?	Total Cost CapEx	Total Cost/Trip OpEx	Avg Revenue per Trip (\$)	TDV (Trips/Day/Vehicle)	Margins per vehicle per day (Rev-OpEx)	Break even days
Japan		2,000	Yes	\$0.000	\$0.609	\$3.00	\$4.800	\$11.48	0
Australia	2,000	25,000	Yes	\$1,950,000.000	\$1.807	\$4.00	\$4.800	\$10.53	7
NZ	6,000	10,000	Yes	\$5,880,000.000	\$1.325	\$3.50	\$3.600	\$7.83	75
Korea	50,000	50,000		\$34,000,000.000	\$0.398	\$1.20	\$4.000	\$3.21	212
Malaysia	5,000	5,000		\$3,375,000.000	\$0.722	\$1.50	\$3.000	\$2.33	289
TOTAL	\$45,205,000	92,000						\$5.83
